Top Skills

Claude Cowork
Unix
Matplotlib

Languages

Português (Native or Bilingual)
Inglês (Professional Working)

Certifications

Certificate of completion: Claude 101
Introdução ao Linux
AWS Educate Introduction to Generative AI - Training Badge
Ciência de Dados e Machine Learning
Conceitos de Gamedev

Honors-Awards

OBMEP - Medalhista de Bronze
Primeiro Lugar - Hackathon de Construção de Agentes de IA
Campeão do Hackfools 2026
Campeão Capture The Flag

Alex Santana

Software & Data Engineer | Information Systems @ USP | Python | Java | SQL | Machine Learning
São Paulo, São Paulo, Brazil

Summary

I am an Information Systems undergraduate at the University of São Paulo (USP), focused on Software Engineering, Backend Development, Data, and Artificial Intelligence.My experience combines software development, academic research, and real-world technology projects. I currently work on Software Testing & Debugging research using Java, Apache Maven, and code coverage analysis on software benchmarks, while also participating in Data Science and Artificial Intelligence initiatives using Python and databases.I also work on technology projects within the university community. At DASI USP, I contribute to IT projects and full-stack development, including DaSIboard, an academic platform used by more than 700 Information Systems students. My experience includes backend development, APIs, databases, infrastructure, and technical project coordination.My technical stack includes Python, Java, TypeScript, JavaScript, SQL, PostgreSQL, MySQL, FastAPI, Node.js, REST APIs, Docker, Git, GitHub, and Linux, with additional experience in Machine Learning, Data Science, Data Analysis, Generative AI, and Software Engineering.I am particularly interested in Software Engineering, Backend Engineering, Data Engineering, Machine Learning, and Artificial Intelligence, especially problems involving software systems, data, automation, and scalable solutions.Alongside technical work, I participate in research, university outreach, and multidisciplinary technology projects. My achievements include 1st place in an AI Agent Building Hackathon, winning Hackfools 2026, and a bronze medal at OBMEP.Keywords: Software Engineering · Backend Development · Python · Java · TypeScript · JavaScript · SQL · Data Engineering · Data Science · Machine Learning · Artificial Intelligence · Generative AI · Software Testing · Software Debugging · APIs · REST API · PostgreSQL · Docker · Git · Linux

Experience

THE·TEAM

Claude Campus Ambassador
October 2026 - Present (1 month)
São Paulo, Brazil

Síntese Jr

Backend Development Trainee | B2B Consultative Sales
September 2026 - Present (2 months)
São Paulo, Brazil

Trainee at Síntese Jr, a junior IT consulting enterprise, combining backend development and B2B consultative sales.
Developed and maintained backend systems for junior-enterprise clients, applying programming and database best practices.
Took part in B2B consultative sales processes: prospecting, requirements gathering, and client negotiation.
Bridged business needs and technical solutions.

PET-SI EACH-USP

PET Scholar
August 2026 - Present (3 months)
São Paulo, Brazil

Scholar of the Tutorial Education Program in Information Systems (PET-SI) at EACH-USP, active across the program's three pillars.
Contributed to applied research and academic output in Information Systems.
Supported teaching activities and peer mentoring for undergraduates.
Developed university outreach (extension) projects.

Universidade de São Paulo

Undergraduate Research Assistant
July 2026 - Present (4 months)
São Paulo, Brazil

Undergraduate Research Scholar (PUB Program/USP), SAEG research group (Software Analysis and Experimentation Group), supervised by Prof. Dr. Marcos Lordello Chaim.
Research software testing and debugging techniques for the project "Data Generation for Software Testing and Debugging Experimentation."
Use the Jaguar 2 tool to collect control-flow coverage data (line coverage) on Java programs from the Defects4J benchmark (875 real defective versions, 17 open-source projects).

Apply Java and Apache Maven for large-scale test execution and data collection.
Work aimed at publication at scientific venues such as SICUSP.
Keywords: Java · Data Analysis · Software Testing · Software Engineering · Apache Maven

Each In The Shell (EITS)
Cybersecurity Researcher
September 2026 - Present (2 months)
São Paulo, Brazil

Security researcher at Each In The Shell (EITS), focused on cybersecurity and network security.
Researched and analyzed vulnerabilities in systems and networks.
Studied offensive and defensive techniques (pentesting / CTF).
Produced technical content on information security best practices.

Hype - Data & AI
Data & AI Researcher
May 2026 - Present (6 months)
São Paulo, Brazil

Academic researcher at Hype - Data & AI, USP's Data Science & AI outreach group.
Applied research in data science and artificial intelligence, using Python and databases.
Took part in internal AI projects and challenges.
1st place, group's AI Agent Building Hackathon.
Keywords: Python · Machine Learning · Artificial Intelligence · Databases · Data Science

Diretório Acadêmico de Sistemas de Informação - DASI USP
IT Project Coordinator
March 2026 - Present (8 months)
São Paulo, São Paulo, Brazil

IT project coordinator at the Information Systems Student Council (DASI USP), also serving as an academic member.
Developed and maintained internal systems for the student community.
Acted as liaison between faculty and students for pedagogical improvements and academic issue resolution.
Managed the organization's technology infrastructure.

Keywords: Project Management · Full-Stack Development · TypeScript · Infrastructure · Technical Leadership

USPCodeLab Leste

Web Development Project Manager

June 2026 - Present (5 months)

São Paulo, Brazil

Managed web development projects at USPCodeLab Leste, EACH-USP's technology outreach lab.

Planned and tracked timelines for web development projects.

Coordinated cross-functional development teams.

Applied agile project management methodologies.

Semana de Sistemas de Informação

Organizing Committee Member

March 2026 - Present (8 months)

São Paulo, Brazil

Organizing committee member of Information Systems Week, the program's annual academic event at USP, across Sponsorship/Finance and Creative/ Communications.

Prospected sponsorships and managed the event budget.

Developed visual identity and marketing strategies for student engagement.

Direct communication with partners and sponsors.

Keywords: Event Management · Partnerships · Marketing · Communications · Fundraising

Conway USP - Gamedev e Comp. Gráfica

7 months

Design & Communications Lead

August 2026 - Present (3 months)

São Paulo, Brazil

Responsible for design and communications at Conway USP, a game development and computer graphics outreach group.

Created graphic materials and visual identity to promote the group's projects.

Managed institutional communications and social media presence.

Project Organizer

April 2026 - August 2026 (5 months)

São Paulo, Brazil

Coordinated timelines and managed scope for projects.

Facilitated communication between programming, art, and sound teams.

Implemented agile methodologies (Scrum/Kanban) for sprint tracking and milestones.
Organized technical and design documentation (GDD).
Keywords: Project Management · Agile Methodologies · Scrum · Game Development · Technical Documentation

Education

Universidade de São Paulo

Bacharelado, Sistemas de Informação · (January 2026 - December 2029)
